Module: WAMD

TD -TP 1: Build a Responsive Portfolio Using HTML, CSS and JavaScript

1. Lab Objectives

At the end of this lab, students should be able to:

- Build a complete web page using **HTML5**.
- Structure a web page using **semantic HTML elements**.
- Apply **CSS** to create a clean and responsive user interface.
- Add basic **JavaScript interactivity**.
- Manipulate HTML elements using the **DOM**.
- Handle user events such as button clicks and form submission.
- Organize a small front-end project using separate HTML, CSS and JavaScript files.
- Test and debug a web application using **browser Developer Tools**.

2. Tools and Technologies

You will use:

Tool / Technology	Purpose
Visual Studio Code	Code editor
HTML5	Web page structure
CSS3	Styling and responsive layout
JavaScript	Interactivity and DOM manipulation
Google Chrome / Firefox	Testing and debugging
Browser DevTools	Inspect, debug and test responsiveness

Recommended project structure

```
portfolio/
│
├── index.html
├── css/
│   └── style.css
├── js/
│   └── script.js
├── images/
└── ...
```

3. Lab Statement

Problem

You have been asked to develop a **responsive personal portfolio website** for a student or junior developer. The portfolio must allow a visitor to quickly discover:

- Who the developer is
- Their skills
- Their projects
- Their education or experience
- Their contact information

The website must be designed using **HTML5, CSS3 and JavaScript**. The portfolio should work

correctly on different screen sizes, including:

- Desktop
- Tablet
- Smartphone

The final website should have a **clean, professional and responsive interface**.

Module: WAMD

4. Functional Requirements

The portfolio should contain at least the following sections:

5. Deliverables

Students should submit their work through the course Classroom.
The submission must contain:

1. GitHub repository link containing the complete project (index.html, css/style.css , js/script.js, images/ if used).
1. Screenshots of the final portfolio.
2. A README.md file containing:
    - Student name
    - Project description
    - Technologies used
    - Implemented features

Optional: Students may deploy their portfolio using GitHub Pages and provide the live website URL.
